LinkedIn : <https://www.linkedin.com/in/jaswitha-data-science/>

SUMMARY:

AI/ML Engineer skilled in ML model development, deployment, and monitoring, with hands-on experience achieving up to 95% accuracy across forecasting, classification, and object detection projects. Strong in Python, ML algorithms, and Flask deployment, with a proven ability to collaborate and deliver production-ready solutions.

SKILLS:

Programming & Backend: Python, OOP, FastAPI, SQL, Git

Generative & Agentic AI: LLMs, RAG, AI Agents, Multi-Agent Systems, LangChain, LangGraph

RAG & NLP: Embeddings, Text Chunking, Semantic Search, FAISS, Document Processing

Machine Learning: Scikit-learn, Classification, Regression, Ensemble Learning, Feature Engineering

Data & Visualization: Pandas, NumPy, Data Analysis, Power BI, Data Visualization, Model Evaluation

Computer Vision: OpenCV, YOLOv5, Object Detection, Image Processing, Video Analysis.

EXPERIENCE:

Data Science Associate

AudvikLabs Private Limited

Feb 2025 – Nov 2025

Bengaluru

- Solved real-world business and analytical problems by building end-to-end machine learning solutions across time-series forecasting, classification, and computer vision domains.
- Designed, trained, and optimized ML models including ARIMA, Random Forest, and YOLOv5, achieving 90–95% accuracy through effective feature engineering and hyperparameter tuning.
- Implemented robust data preprocessing pipelines, handling categorical encoding, trend analysis, and dataset preparation for structured and unstructured data.
- Deployed production-ready ML models using Flask-based web applications, enabling batch predictions via CSV uploads and real-time inference.
- Applied model evaluation and monitoring techniques (RMSE, accuracy tracking, input validation) to ensure consistent performance after deployment.
- Collaborated with the team to identify insights and visualized key metrics using Matplotlib and Seaborn.
- Documented analysis process and created reports for internal use and project presentations.

Data Science Intern

Rubixe - AI Solutions

Aug 2023 – Mar 2024

Remote

- Assisted in data collection, cleaning, and analysis using Python and SQL. Conducted exploratory data analysis, developed machine learning models, and communicated insights through visualization.
- Collaborated with team members on real-world projects, gaining practical experience in data science methodologies and tools.
- Applied statistical techniques to extract meaningful patterns and trends from diverse datasets. Contributed to innovative solutions and gained valuable skills in a dynamic and supportive environment.

PROJECTS:

Tomato Price Forecasting System

Machine Learning

- Solved the problem of agricultural price volatility by building a time-series forecasting system for tomato prices.
- Implemented ARIMA for trend and seasonality modeling and Random Forest for feature-based prediction.
- Performed feature engineering using temperature and historical price data, improving forecast reliability.

- Achieved 92–95% prediction accuracy with optimized parameters and evaluated performance using RMSE.
- Applied moving averages to analyze long-term price trends and smooth short-term fluctuations.
- Collaborated with peers to debug data quality issues and improve model stability.

Product Rating Prediction Web Application
Machine Learning

- Built an ML-based classification system to predict overall product ratings from structured review data.
- Processed categorical features (packaging, price, smell) using Label Encoding and data normalization.
- Trained a Random Forest classifier achieving 94–96% accuracy on validation data.
- Developed and deployed the model using a Flask web application, enabling CSV file uploads for real-time predictions.
- Implemented basic model monitoring by tracking input data consistency and prediction distribution after deployment.

Object Detection Using YOLOv5
Computer Vision, OpenCV, YOLOv5

- Designed and trained a custom YOLOv5 object detection model to detect specific regions from video streams.
- Created and annotated a custom dataset and performed frame extraction from videos for training.
- Fine-tuned hyperparameters to achieve 90% detection accuracy in real-time scenarios.
- Integrated the model with OpenCV for live video inference and testing.
- Supported teammates by resolving annotation errors and improving dataset quality.

Multi-Agent Python Documentation Assistant

- Developed a multi-agent AI assistant to answer Python programming queries using official Python documentation.
- Implemented a Classification Agent to categorize queries into Syntax, Functions, OOP, Modules, Exceptions, File Handling, and General topics.
- Built a Retrieval Agent using Sentence Transformers and FAISS to retrieve relevant documentation.
- Developed a Response Agent using the Google Gemini API to generate answers based on retrieved documentation.
- Implemented an end-to-end workflow using Python, document processing, embeddings, vector search, and LLM-based response generation.

CERTIFICATIONS:

- Certified Data Scientist(CDS) at Datamites Institute.
- Certified Data Scientist at NASSCOM (FutureSkills Prime).
- Data Science Foundation Certification at IABAC.
- Problem Solving through Programming in C at NPTEL.
- Python basic certificate at HackerRank.
- Data Structure and Algorithms using Java at NPTEL.
- Data Analytics and Visualization Job Simulation Certificate at Accenture.

EDUCATION:

Velagapudi Ramakrishna Siddhartha Engineering College – Vijayawada Master of Computer Applications, CGPA: 9.6/10.0	2023
Sree Vidya Degree College – Gudivada Bachelor of Science – Mathematics, Statistics, Computer Science, CGPA: 9.62/10.0	2021
